

RICHARD CHO

SOFTWARE ENGINEERING STUDENT

CAREER OBJECTIVE

I'm an aspiring software engineer looking to become a full-stack web developer. I am passionate about tech and hope to gain a lot of experience in the industry. Since I'm somewhat of a latecomer, I want to be exposed to lots of different roles and functions of a web developer in order to kickstart my career in the industry.

PROFESSIONAL SKILLS

- Web development
- Intermediate video and photo editing
- Community engagement and public relations
- Intermediate Japanese

WORK EXPERIENCE

ENGLISH TEACHER

Japan Exchange and Teaching Programme | Jul. 2016 to Jul 2021

- Assisted in creating a city-wide English teaching curriculum aimed at increasing the competency of elementary school students.
- Led and organised cultural exchange sessions with the local community.
- Interviewed and evaluated potential candidates for the city's annual study exchange program held in Cowra.
- Authored and published more than 30 articles in local newsletters.

ASSISTANT GRANTS ADMINISTRATOR

Office of Environment and Heritage | Feb. 2015 to Jul. 2016

- Assessed grant applications from councils, NPOs and businesses for a range of grant programs as part of NSW's 'Waste Less, Recycle More' initiative.
- Managed project delivery of key milestones to ensure projects are successful.
- Performed audits to ensure funds were spent according to the funding agreement.
- Gathered and analysed project data such as how many new jobs were created, amount of waste processed, etc.

ACADEMIC BACKGROUND

CODER ACADEMY

Full-stack web development bootcamp | Aug. 2021 to present

- Learning to code using a variety of frameworks and languages such as HTML, CSS, Ruby, JavaScript, Rails and React.

WESTERN SYDNEY UNIVERSITY

Bachelor of Business and Commerce, Major in Accounting & Minor in Japanese

- Aug. 2013 to May 2017
- Graduated with GPA of 5.48 (out of 7).
- Member of the Asian Pacific Club, helped support Japanese exchange students and conducted tours around Sydney.
- Volunteered during university 'Open Day' events. Duties include giving tours around the campus to new and prospective students.

COMPLETED PROJECTS

ONLINE PORTFOLIO ([LINK](#))

My first project required me to create an online portfolio using HTML and CSS. I put a lot of thought and consideration regarding the layout and colour scheme of the site. One major requirement was that it needed to be responsive and viewable on a variety of devices. It was a challenge learning about CSS but I feel like this project helped me understand important concepts such as the box model and how flexbox interacts with items on the screen.

TERMINAL APPLICATION ([LINK](#))

My next major project required me to build a terminal application from scratch using Ruby. I decided to build an inventory management system that allows users to input data which could then be read and manipulated inside the terminal. I also implemented other features such as the saving and loading of inventory data, and also the ability to export the data as a CSV file which could then be used in an external program like Excel for further processing. The need to implement logic, input/output and error checking helped me to understand how challenging developing an application is and how much work goes into making sure everything works the way its intended to.
